

## NPK Blends (Custom & Standard)

### Product Overview

NPK Blends are ready-to-use multi-nutrient fertilizers formulated to deliver a balanced supply of the three primary macronutrients- Nitrogen (N), Phosphorus (P), and Potassium (K). These blends are suitable for a wide variety of soils and crops, ensuring optimal plant growth and higher productivity.

At New Pack Agro, we manufacture both standard formulations and customized NPK blends designed according to specific crop and regional requirements. Our advanced blending technology ensures uniform nutrient distribution, high granule strength, and consistent performance in the field.

### Common Grades Available

- NPK 20:20:20 – Balanced general-purpose fertilizer for most crops
- NPK 15:15:15 – Ideal for soil replenishment and root zone nutrient support
- NPK 12:32:16 – Suitable for phosphorus-demanding crops during early growth
- NPK 10:26:26 – Enhances root establishment and flowering
- NPK 17:17:17 – Balanced nutrition for continuous cropping systems

### Applications

NPK Blends can be applied through broadcasting, band placement, or incorporated into soil during pre-planting. They are suitable for:

- **Field Crops:** Wheat, maize, rice, cotton, sugarcane
- **Horticultural Crops:** Fruits, vegetables, and plantations
- **Ornamental Plants:** Lawns and landscaping

### Benefits

- Provides balanced nutrition in one application
- Enhances soil fertility and promotes robust root growth
- Customizable nutrient ratios to meet specific crop needs
- Uniform granules ensure even nutrient distribution
- Reduces nutrient losses and improves efficiency of uptake

### Packaging Options

- 25 Kg / 50 Kg HDPE Bags
- Jumbo bags or bulk supply upon request

### Manufacturing & Quality

Produced in our state-of-the-art facility in Gujarat, India, following strict quality standards to ensure consistency, solubility, and compliance with international fertilizer norms. Every blend is supported by Technical Data Sheet (TDS) and Safety Data Sheet (SDS) documentation for customer assurance.

### Export & Supply

As part of our global operations, New Pack Agro Chemical Fertilizer Trading LLC supplies NPK blends to clients across Asia, Africa, and the Middle East, offering both branded and private-label options.
